How to Use This Swipe File

Each of the 100 formulas below is a fill-in-the-blank template. Replace the [bracketed text] with your own keyword, audience, number, or outcome. The example below each formula shows you exactly how it looks in practice.

- ◆ Replace ALL bracketed placeholders with specifics — vague titles rank poorly
- ◆ Use the AI Title Generator at icreatixpro.com to generate and score variations
- ◆ Aim for 55–72 characters for optimal Google SERP display (no truncation)
- ◆ Test 2–3 versions with different tones before publishing — CTR varies widely
- ◆ Pair Data-Driven titles with real statistics for credibility and rich snippets
- ◆ Contrarian and Emotional titles work best on social; How-To is best for search
- ◆ Add the current year to evergreen titles to signal freshness to Google
- ◆ Numbers should be specific — '7 Ways' outperforms 'Several Ways' by 36%

SEO Score Reference

Score	Range	What It Means
■ Excellent	70–100	Strong keyword placement, optimal length, power words present
■ Good	50–69	Solid title — minor tweaks could improve CTR
■ Improve	< 50	Needs stronger keyword placement or length adjustment

■ How-To

Step-by-step titles that promise a clear outcome. Highest search volume for informational intent.

1 **How to [Achieve Outcome] in [Timeframe] (Even If [Common Obstacle])**

e.g. e.g. *How to Lose 10 Pounds in 30 Days (Even If You Hate Exercise)*
